## **Artist statement**

I am Veera Kälkäjä or Venuza a visual artist living and studying in Tornio. In my art, I deals with, among other things, moments where emotion creates an atmosphere with colors.

As a rule, the works are built either by the power of brushes and acrylic paints or by the touch of the drawing board and pixels. I have a curious mind and also fascinated by other working tools, such as a camera. On the other hand, all ideas spring from my sensing in life, such as movies, books, poems, nature, memories, colors, history and music.

I completed high school in 2021 at Hirsikampus in Pudasjärvi, and will graduate from Lapland University of Applied Sciences as a visual artist in 2025. My future goal would be to work in animation, and implement various projects also with the power of a brush for exhibitions.
